SPIKE-DEVIL DESCRIPTION

Spike-Devil is a spike system *with advanced mobility over traditional designs*. The frame folds up and rolls up into the world's smallest spike system.

The frame enhances deployment, as it can be deployed with one hand, and the winder operated with the other hand. Spike Devil's light weight allows the officer to Slide the frame, to the other side of the road, and later pull it into the path of a target. Other designs have officer cross the roadway and set up spikes.

The Spike-Devil when deployed slides across the surface in a covert style, low to the ground, and hard to see by the driver of the target vehicle.

A feature called A.L.E.C. Auto locks the frame in its Expanded Configuration. Locked open, it spikes more tires. Spike Devil's improved handling goes in and out of traffic, very smooth. When the Devil hits the shoulder the auto lock is disabled and system collapses to prevent spiking unwanted targets.

SPIKE-DEVIL DESCRIPTION

Spike-Devil is available in three sizes, by adding sections, we make for larger models.

WHAT'S INCLUDED

Each system includes the spike frame, a deployment strap attached to a winder, and a storage holster.

The Holster allows quick access to the Spike-Strip and includes a mounting bracket. A Motorcycle bag is an option.

DEPLOYMENT STRAP

The Spike Devil deployment strap wraps around the frame and holds the system together during storage, and deployment. Smaller hands can handle Spike Devil.

WINDERS

The Loop winder with its beveled edge give superior mobility.

Twisting the loop side ways, give you slack to release the line or twist back to deploy or recover. Simple design and performance beyond any type winder. Officers gets better deployments and can move faster for cover.

CORD-REEL WINDER

Spike Devil adds the feature of a cord-reel winder to the accordion concept.

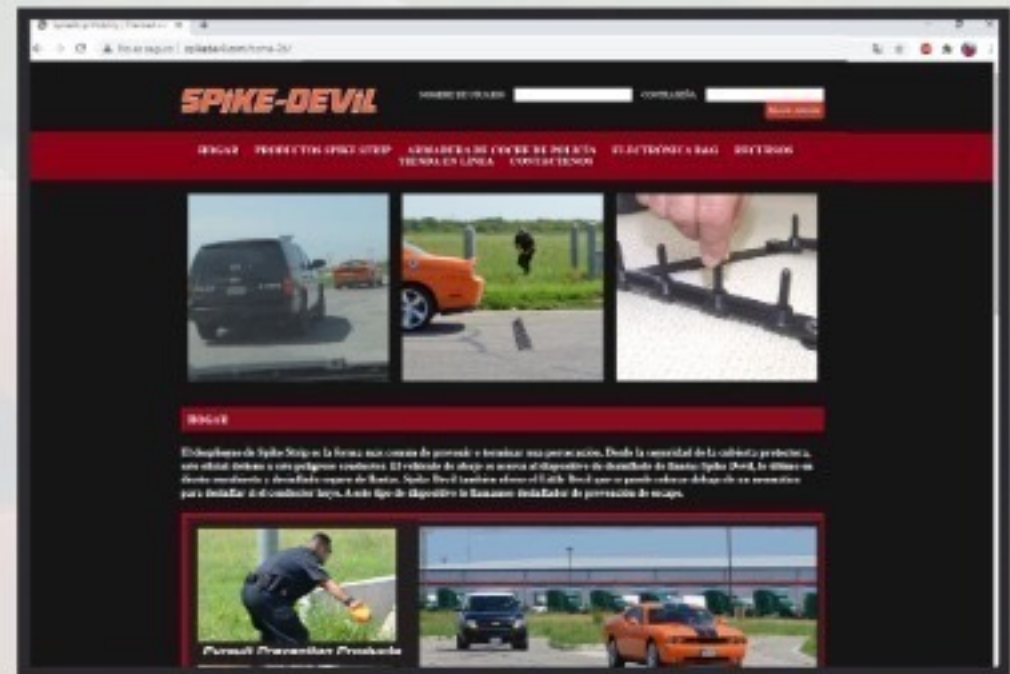

Cord-reels used on other systems, have been plagued with failures, placing officers at risk. Spike Devils Cord Reel and Loop Winder are built tough, they have a heavy duty cord and a thick plastic frame and parts that will not fail nor tangle. Cord reel has a service port not found on lesser designs.

Both winders have a 80 foot heavy duty cord and are a winder is included with the Spike Devil package.

E-TRAINING SUPPORT

Spike-Strip Mfg. offers Training Manual downloads, videos, photos and illustrations, at www.spikedevil.com and www.spikedevil.net.

Our spikedevil.net is a training site for all our products. All manuals are on line and E-learning is navigable in the field from a smart phone.

TRAINING UNITS

Spike Devil's tough nylon makes it usable as a training aide in a parking lot. For a more advanced class, Spike Strip Mfg. makes available Trainer units for use on a track, with moving cars. We have loaner program of our trainer units available from our distributors.

A close up shows the rubber spikes that protrude but do not damage tires.

For Factory parts, trainers, or service, call Tom Bruce. 830-899-4575

For Training and Sales, call Henry DeVilliers at 210-782-5933.

SPIKE DEVIL SERVICE

Each Spike-Strip device comes with a package of 8 replacement spike cartridges and spare O-rings.

The Spike covered with the cap and an o ring is a cartridge. The Spike-Devil cartridge, presses into place without tools. You can add extra o rings to better hold the spike in place.

WARRANTY

Spike-Strip tire deflation devices are fully warranted to be free of defects in material and workmanship for life, to the original purchaser. Defective parts will be replaced or repaired free of charge.

This lifetime warranty also includes free replacement of sections damaged in a pursuit.

In order to maintain uniformity in your departments, any upgrades of older systems are done for the price of a replacement pack of spikes.

Contact us for more info and the latest replacement parts.

Spike-Devil #10011, 7 section, holster, loop winder \$299.95

Spike-Devil #10010, 7 section, holster, Cord reel winder \$323.00

Spike-Devil #10021, 9 section, holster, loop winder \$323.00

Spike-Devil #10020, 9 section, holster, Cord reel winder \$431.00

Motorcycle bag, #3003. \$33.00

PURSUIT PREVENTION

Spike Strip Mfg. Offers products that can be placed under a stationary car, so that if the car is moved it provides deflation of the tires. This is a way of preventing a pursuit from occurring in a traffic Stop, Checkpoint, warrant service, and other applications.

Spike Strip 2 folds up in a compact form and when deployed opens up wide to be deployed. The system is designed so that it can be swung under the car in front of the tire with little effort. This keeps the officer focused on the car, driver for better situational awareness. Spike-Strip 2 Model# 11000, \$65.00

TACT STRIP

Tact-Strip 2 is a compact Tire deflator designed to be deployed on a car and hidden in place. The car should not have a driver positioned to drive.

Tact Strip 2, Model # 12002H, \$17.00
